

Haiti's Postage Stamps Overprinted For Fiscal Use

This is an exhibit of all known postage stamps of Haiti overprinted for fiscal use. In 1923 and in the 1970's, a shortage of revenue stamps prompted the government of Haiti to resort to the expediency of overprinting surplus postage stamps for use as fiscals. These were created by applying different overprints to 79 different Scott listed stamps resulting in ninety-four major varieties. They are were used on electricity, telephone, and water bills, as well as other types of documents. Within the confines of a single frame exhibit, usage on as wide a variety of documents is shown.

Lacking access to official government records, it is not known when many of these stamps were overprinted or the quantity overprinted. Therefore, these revenues are exhibited in the order in which the postage stamps were issued. If canceled by manuscript or a handstamp, the date indicated is noted. When a stamp is canceled without a date, or if a stamp is not tied, a date on the document is used to indicate the period of usage. Thus documents in this exhibit, or in the exhibitor's reference collection, have been used to provide a means of establishing the earliest known usage (EKU).

Currency:

100 centimes (c.) = 1 Gourde (G.)

Issue of 1914

Haiti's first postage stamps were overprinted for use as fiscals in 1923. The overprint was applied by a handstamp made locally. Fewer than five examples of the Nord Alexis stamps are known.
